Specifications and Features

The butane burners we offer at Karl's are designed for tabletop use, and operate on a single can of butane fuel. One can of fuel will last the burner about 2 consecutive hours. The burner is perfect for indoor, as well as outdoor activities when a portable stove is necessary. The burner can be used for anything a regular range is used for, it is also equipped with a knob to change the heat and flame level. The butane burner has an efficient power level of 10,000 BTU per hour. The unit is about 12 inches by 12 inches, and comes in a carry case for easy portability.
