Description

The trays we offer at Karl's Event Rental are 4-tiered trays in either a stainless-steel finish, or a decorated finish. All the trays come unassembled for easy transportation. The trays stand about 27 inches tall, and each tray has a different size circumference. The first tray is 10 inches, the second tray is 15 inches, and the third tray is 20 inches, while the last tray is 25 inches.

Assembly Tips

1. The trays are put together using a center pole which is inserted through a hole in each section.
2. The top end of the pole has a ball on it to hold the pieces in place, as well as preventing them from slipping off.
3. It is sometimes helpful to start with the pole upside down, so the ball on the end is near the floor. The smallest tier should be put in first, followed by the larger ones.
4. The last piece of the tier should be the base, and then washers and lug nuts are used to secure all of pieces together.
